Industry VS growth

Do companies that have been on this list longer have a higher chance of appearing again in this list?

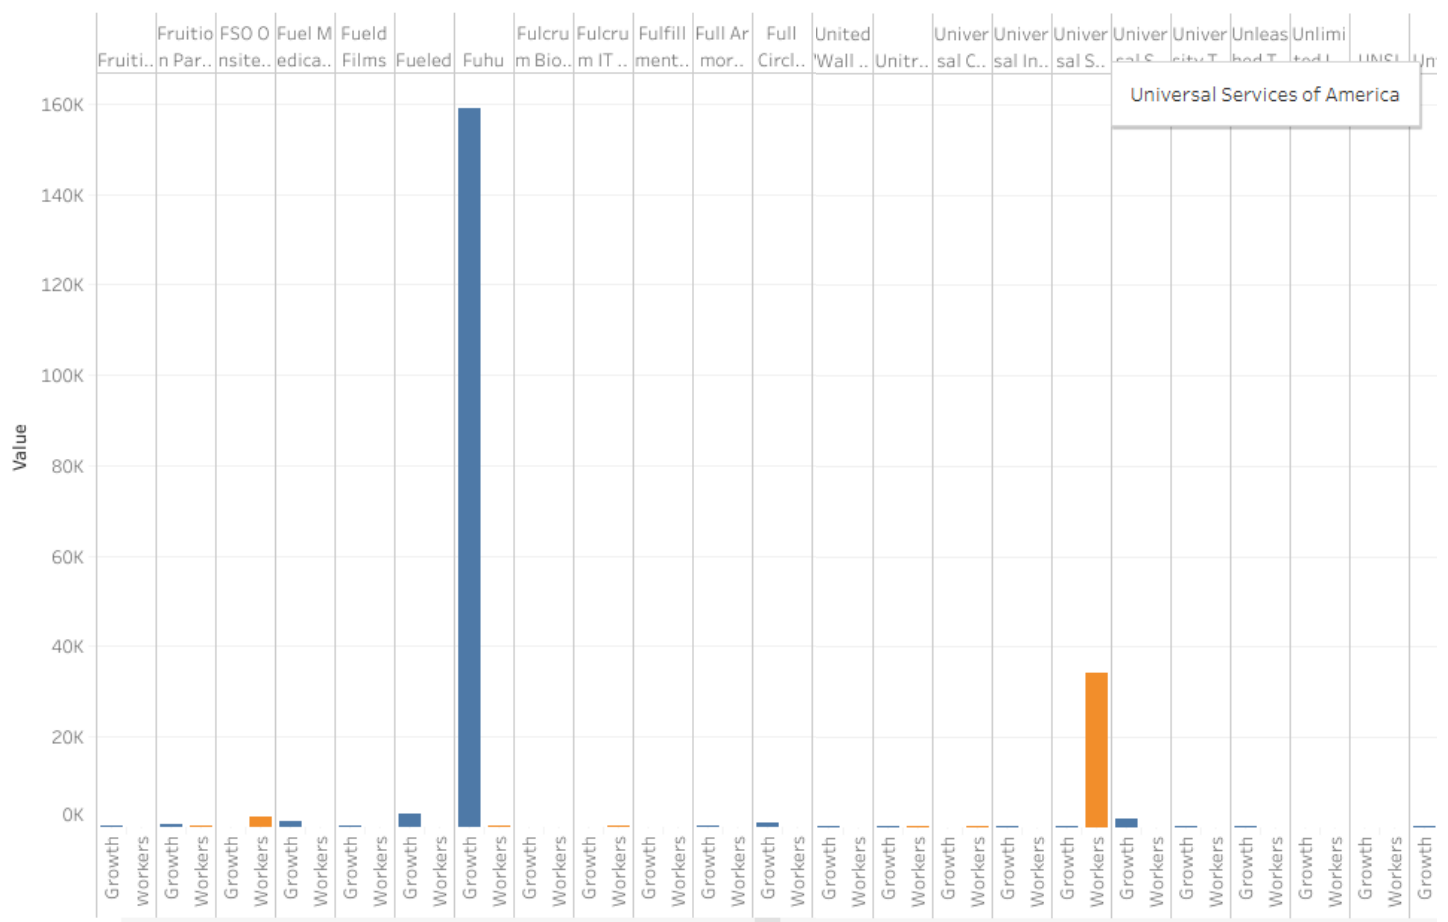

As seen in figure 2, some companies have been on this list for more than one year, see example “(add)ventures” in the extract below. This example, “(add)ventures” has been on the list 10 times, which shows that a company that has been on the list once, could very well have a chance to be on it again.

Figure 2: Section of graph of companies that have been on the list over a few years. Tableau Software (2025).

As seen in figure 3, a side-by-side bar graph, more workers do not always correlate to more growth. Fuhu, with 227 workers and 158 957 growth, compared to Universal services of America, with 34 219 workers and 169 growth substantiates the claim that more workers do not always affect the growth of the company.

Number of workers vs growth of a company

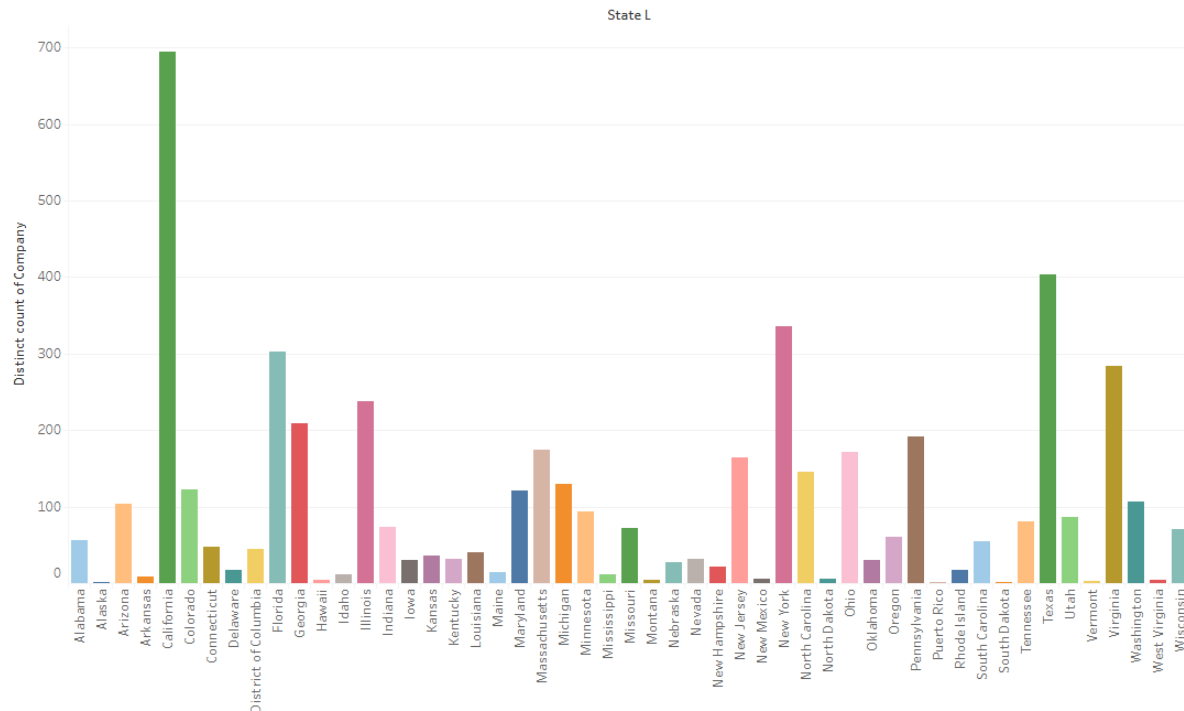

Which state can you find most of the IT companies in?

As seen in figure 4, California is home to the most IT companies in USA, followed by Texas and then New York.

Figure 4: Graph of each state in the USA and the amount of IT companies. Tableau Software (2025).

State vs Amount of IT Companies

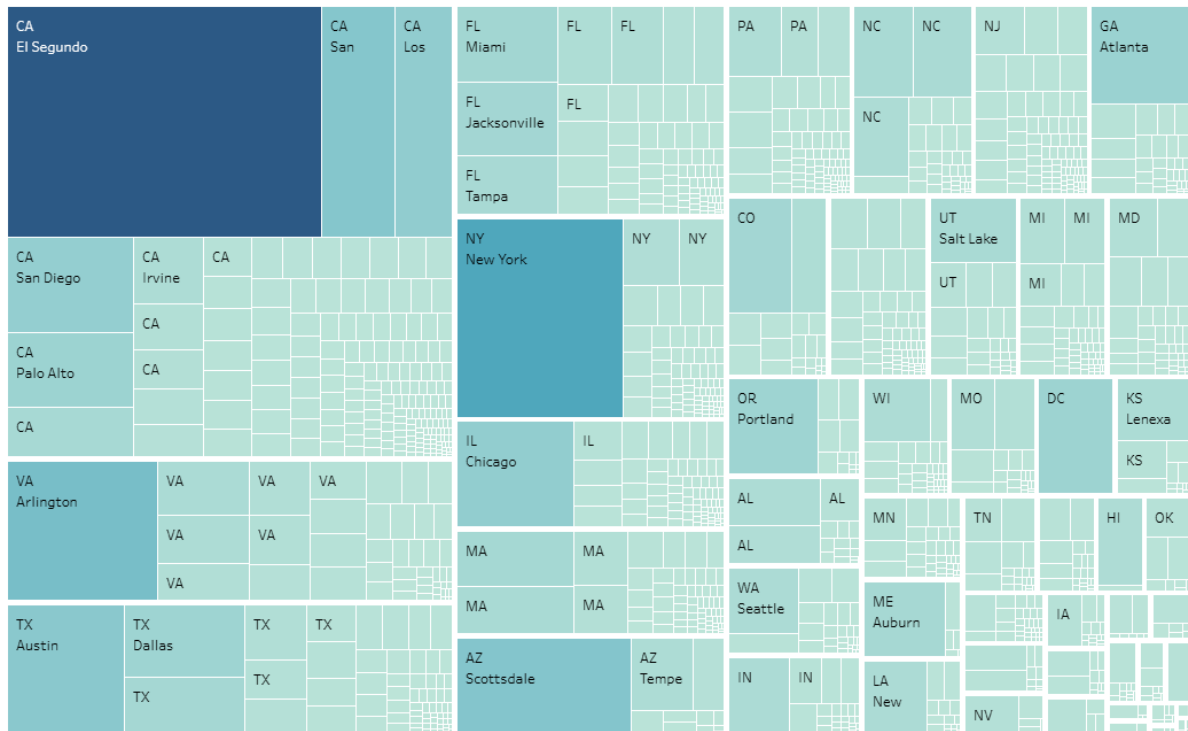

Which cities have seen the most growth?

As seen in figure 5, the cities that has seen the most growth are El Segundo, New York, and Arlington.

Figure 5: A graphical representation of cities and their growth. Tableau Software (2025).

Cities vs Growth
